DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 5, 2003 has been entered.

Claim Rejections - 35 USC § 103

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 20-26 and 28-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over GB 2,297,977 A. The reference discloses detergent compositions containing surfactant, a detergency builder comprising zeolite P, clay, and an optional clay flocculant (abstract). Suitable surfactants include anionic, nonionic, cationic amphoteric and zwitterionic materials, as well as mixtures of same (p. 3, 3rd para.) Alkyl sulfates and their ethoxylated analogues are disclosed as suitable, as are alkoxylated fatty alcohols (p. 3, bottom). Total surfactant concentration is 1-60% (p. 5, 4th para.) The clay is preferably a smectite, and is present at 0.05%- to 40% (p. 8, 3rd para.) A number of smectites are disclosed as suitable, and use of a combination of clays would

Art Unit: 1751

be obvious in the absence of unexpected results. Suitable flocculating agents include lime and alum (p. 11, 4th para). The floc is present at 0.005% to 10% (p. 10, 3rd para.) Carbonate salts and polycarboxylates may be added (examples). Use of phosphates as builders is disclosed as conventional on p. 1. Addition of fluorescers (brighteners) is disclosed at the bottom of p. 12. Preferred forms of the compositions are as granules, powders and tablets (p. 13, 2nd para.) The examiner takes the position that these are intimate mixtures. Addition of cationic softeners is disclosed at the top of p. 10. This reference differs from the claimed subject matter in that it does not disclose a composition which reads on applicant's claims with sufficient specificity to constitute anticipation.

It would have been obvious at the time the invention was made to make such a composition, because this reference teaches that all of the ingredients recited by applicants are suitable for inclusion in a surfactant composition. The person of ordinary skill in the surfactant art would expect the recited compositions to have properties similar to those compositions which are exemplified, absent a showing to the contrary.

In the case where the claimed ranges overlap or lie inside ranges disclosed by the prior art, a *prima facie* case of obviousness exists. *In re Wertheim*, 541 F.2d 257, 191 USPQ 90 (CCPA 1976); *In re Woodruff*, 919 F.2d 1575, 16 USPQ2d 1934 (Fed Cir. 1990).

Response to Arguments

4. Applicant's arguments filed December 5, 2003 have been fully considered but they are not persuasive. Applicant argues that the GB reference does not provide motivation to form intimate mixtures. This is not persuasive because preferred forms of the compositions disclosed compositions are as granules, powders and tablets (p. 13, 2nd para.) Granules, formed by granulation, and powders, formed by spray drying, are regarded in the art as intimate mixtures. If applicant means to imply something other than this art-accepted meaning, applicant should point the examiner to an explicit definition in the specification. Applicant is entitled to be his own lexicographer, but applicant must take this option explicitly at the time of filing.

5. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 1751

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
